Projects

SafePing – Geofenced Safety Automation Platform MERN, Twilio, Leaflet	2026 – Present
– Built a MERN-based application that automates safe-arrival notifications using geofencing, live location tracking, and SMS alerts – Implemented browser geolocation tracking and Haversine-based distance calculations to detect entry into user-defined safe zones – Integrated Twilio SMS APIs with cooldown logic and delivery logging to prevent duplicate alerts and improve reliability – Developed JWT authentication, protected routes, contact management, and RESTful APIs using Express.js and MongoDB	
Placemtor – AI-Powered Placement Readiness Platform MERN, Groq LLM APIs	2025
– Built a MERN-based platform that assesses placement readiness through coding analytics, resume ATS evaluation, and AI-powered mock interviews – Integrated LeetCode GraphQL and Codeforces APIs to track coding performance and calculate a unified readiness score – Developed AI-powered resume analysis, interview evaluation, and personalized learning roadmap generation using Groq LLM APIs – Implemented JWT authentication, protected routes, REST APIs, and MongoDB for secure user and assessment management	
SkillBarter – Skill Exchange Platform MERN Stack, JWT, Socket.IO	2025
– Built a full-stack MERN platform for peer-to-peer skill exchange, enabling users to connect, request skill swaps, and collaborate without monetary transactions – Implemented JWT authentication, protected routes, and mandatory profile onboarding using React, Express.js, and MongoDB – Developed swap request workflows with server-side validation for sending, accepting, rejecting, and completing exchanges – Integrated Socket.IO-based real-time messaging, enabling communication only between users with accepted swap requests
